

Key Competence and Skills

- ✓ **Languages:** PHP, JavaScript, Python, C, SQL
- ✓ **Frontend:** HTML, CSS, Tailwind CSS, Blade templates, responsive UI
- ✓ **Backend:** Laravel (PHP), login systems and role-based access
- ✓ **Databases:** PostgreSQL, MySQL
- ✓ **DevOps & Tools:** Git & GitHub, Vercel, Render deployment
- ✓ **AI / ML:** TensorFlow, Keras, Deep Learning, Transfer Learning, Grad-CAM, LightGBM
- ✓ **Embedded:** Arduino, sensors & actuators, IoT prototyping
- ✓ **Core CS:** Data Structures & Algorithms, Operating Systems, Compiler Design, Digital Logic, VLSI

Languages

✓ **Bengali** – Fluent ✓ **English** – Fluent
✓ **Hindi** – Fluent ✓ **Urdu** – Fluent

Certifications

- ✓ **Next Gen Ideathon 2025**, BRAC University
- ✓ **Graphics Design (Beginner)**, BRAC University, 2023
- ✓ **ReactJS for Beginners**, Great Learning, 2026
- ✓ **Introduction to HTML**, Great Learning, 2026
- ✓ **Generative AI for Beginners**, Great Learning, 2026
- ✓ **Complete Web Development**, Programming Hero (Batch 11)

Profile Summary:

Final-year CSE student at BRAC University who enjoys turning ideas into software that works well and feels good to use. I built and maintain **Ominelle**, a jewelry e-commerce site with real customers and a client behind it, and my work so far spans full-stack web apps, embedded systems and a deep learning thesis on cardiac MRI. I'm looking for a Full-Stack, Web Developer, Software Engineer or AI/ML role where I can take on real responsibility, keep growing and help build products that matter.

Educational Qualification:

- ✓ **B.Sc. in Computer Science & Engineering**, BRAC University | May 2022 – Jan 2027 (Expected)
  Thesis: Hybrid deep learning model for heart disease detection using cardiac MRI scans.
- ✓ **Higher Secondary Certificate (H.S.C.), Science**, Dhaka Imperial College | 2021
- ✓ **Secondary School Certificate (S.S.C.), Science**, National Ideal School | 2019

Projects:

Hybrid Deep Learning for Cardiac MRI Classification | *B.Sc. Thesis, Dept. of CSE, BRAC University*

- ✓ Built a model that looks at a full 20-frame cardiac MRI series and decides if the heart is Normal or Sick, instead of judging one frame at a time. EfficientNetB0 picks up features from each frame, and a BiLSTM, BiGRU or self-attention layer makes sense of the sequence.
- ✓ Tested on 2,879 MRI series with three different data splits. The best setup reached **84.13%** accuracy, **90.68%** sensitivity and **0.933** ROC-AUC, and Grad-CAM showed the model was focusing on the heart itself.
- ✓ My part was analysing the results and comparing the best setup of each of the three architectures.
  Tech: Python, TensorFlow/Keras, EfficientNetB0, BiLSTM, BiGRU, Attention, Grad-CAM

Ominelle – Jewelry E-Commerce Website

- ✓ A jewelry store website that real customers use and a client company has adopted. I built it and still maintain it.
  Tech: HTML, CSS, JavaScript, Vercel Code | Live Demo

Campus Connect Pro *(CSE470 course project)*

- ✓ A campus marketplace where students can list, search and buy used items, with in-app chat, reviews, a karma and badge system and a sustainability dashboard. Admins can manage users and catch things like fake reviews and spam listings.
  Tech: PHP, Laravel, Blade, Tailwind CSS, MySQL, Chart.js Code

Text to Handwritten

- ✓ Turns typed text into handwriting-style notes. Students and creators use it.
  Tech: HTML, CSS, JavaScript, Vercel Code | Live Demo

StudyMate+

- ✓ A study helper with an AI flashcard generator, a quiz maker and a focus timer.
  Tech: HTML, CSS, JavaScript Code | Live Demo

Skincare Bot

- ✓ Asks a few questions and suggests a skincare routine that fits the person.
  Tech: HTML, CSS, JavaScript Code | Live Demo

Hardware Projects:

- ✓ **Touchless Smart Bin** *(CSE360 – Computer Interfacing)*: an Arduino bin that opens when it senses your hand and sorts wet and dry waste using ultrasonic, IR and moisture sensors. It sorted correctly 96.7% of the time over 30 test runs. I wrote all of the firmware.
- ✓ **PoultryGuardian** *(CSE461 – Introduction to Robotics)*: an IoT system for a small poultry farm that tracks temperature, humidity and gas levels and handles feeding and watering automatically.

Awards & Achievements:

- ✓ **4th Position**, Cybernauts Datathon, North South University
- ✓ **Top 8**, BRAC University Hackathon 2023 (team: BRACUALTERZX)

Leadership & Volunteering:

- ✓ **Senior Executive, Event Management**, Robotics Club of BRAC University (2022 – 2025). Planned and organised club events.

Declaration:

I confirm that everything written in this CV is true to the best of my knowledge.
